Dear Mr. Light:

RE: Small Mine Commencement Notification, ML 44931 Metalliferous Minerals

I have reviewed your notice and find it in compliance with our notification requirements. You may proceed with operations as outlined in your plan with the following stipulations:

1. All surface disturbance resulting from your operations on the leased lands will be fully reclaimed to the satisfaction of the Division of State Lands and Forestry and in compliance with the State of Utah Mined Land Reclamation Act.
2. Compliance with the State of Utah Antiquities Act forbidding disturbance of archeological, historical, or paleontological remains; and immediate suspension of operations and notification of the Division of State History in the event such remains are encountered.
3. Granting this approval does not alleviate the necessity to comply with the requirements of the Division of Oil, Gas, and Mining regarding this development. You must contact them and comply with their requirements before beginning any work. Their address is: Division of Oil, Gas, and Mining, 355 West North Temple, 3 Triad Center, Suite 350, Salt Lake City, UT 84180-1203.
 - A. As was discussed at our meeting with Holland Shepherd, a more appropriate arrangement must be made for your on site facilities. Your lease does not allow occupancy of the property except for the purposes of the mining operation.
4. The Division rules require a surety bond be posted to insure reclamation as well as compliance with all other lease terms. In the case of this operation the disturbance of one acre or less will require a bond of \$5,000.00. Your operations will be monitored and it may be determined at a later date that a bond may need to be increased.

Sincerely,

JERRY W. MANSFIELD
MINERAL RESOURCES SPECIALIST
